# Logistics & System Access

GET READY

# AWS ParallelCluster – HPC Infrastructure as Code

# Tutorial Cluster Design

# Access and environment

- You will be given a username and (simple) password
- Log in via SSH
  - [training-XXX@training.day1hpc.com](mailto:training-XXX@training.day1hpc.com)
- Submit jobs via Slurm to queue “graviton”
- Manage software using spack & environment modules
- Cluster will be available only during tutorial

Launch your own HPC7g cluster after the tutorial is over with [HPC Recipes for AWS](#)
